

Airwork's solenoid valves combine big resistance, reliability and versatility of assemblage; the VY series can be assembled in several ways: In-line, on panel, on multiple bases, on manifolds and on cylinders.

Available size are 1/8, 1/4 and 1/2, the available functions are 3/2, 5/2 e 5/3.

La série des électro distributeurs à raccordement direct série VY d'AIRWORK a des caractéristiques multiples de robustesse, de fiabilité et de montage.

En ligne, sur embase multiple, assemblée et directement sur le vérin.

Il est disponible en taille 1/8, 1/4 et 1/2 ainsi qu'en fonction 3/2, 5/2 et 5/3.

La serie di elettrovalvole serie VY di Airwork, possiedono caratteristiche di grande robustezza, affidabilità e versatilità di montaggio, infatti la serie VY si possono montare in diversi modi: in linea, a parete, su base multipla, su collettori e persino direttamente su cilindro. Sono disponibili in tre taglie 1/8, 1/4 e 1/2 nelle funzioni 3/2, 5/2 e 5/3.

TECHNICAL DATA / DONNÉES TECHNIQUES / DATI TECNICI

	1/8	1/4	1/2
Flow rate 6 bar Δp 1 bar / Débit à 6 bar Δp 1 bar / Portata a 6 bar Δp 1 bar	550 Nl/min	1100 Nl/min	4600 Nl/min
Nominal orifice / Diamètre nominal / Diametro nominale	5mm	7.5mm	13mm
Response times mono-stable / Temps réponse monostable / Tempi risposta monostabile	TRA 15ms / TRR 35ms	TRA 19ms / TRR 45ms	TRA 39ms / TRR 60ms

THE KEY POINTS / LES POINTS CLES / PUNTI DI FORZA

Spool seals high quality to guarantee operation under all conditions and temperatures.

Joints de tiroir de haute qualité garantissent un très bon fonctionnement dans des conditions de températures élevées.

Guarnizioni spola ad altissima prestazione per garantire un funzionamento perfetto in tutte le condizioni e temperatura.

Valve's body is very important and it is realized from a full bar, turned and milled on CNC machines, then anodized to give more strength to it and painted to cover any possible outside imperfection.

Le corps de la vanne est très important. Réalisé à partir d'une barre, tournée, fraisée sur des machines CNC, puis anodisé pour donner plus de force puis peint.

Il corpo valvola è molto importante ed è realizzato da una barra piena, tornito e fresato su macchine a controllo numerico, quindi anodizzato per dare più durezza alla superficie e poi verniciato

Manual operating in steel nickel-plated unlike the plastic component this one provides strength and precision even after many interventions.

Commande manuelle en acier nickelé à la différence du composant en plastique. Elle présente une résistance et fournit une précision même après de nombreuses interventions.

L'intervento manuale in acciaio nichelato a differenza di componenti in plastica, fornisce la resistenza e precisione anche dopo molti interventi.

Spacer cages in brass.

Unlike the plastic, brass ones do not deform with the change of temperature, giving more stability to the seals and avoiding any possible backlash.

Cages d'espacement en laiton. Contrairement à la matière plastique, les cuivres ne se déforment pas avec le changement de température, ce qui donne une plus grande stabilité des joints et évite toute réaction possible.

Le gabbie distanziali in ottone a differenza della plastica, non si deformano con il variare della temperatura dando maggiore stabilità alle guarnizioni ed evitando ogni possibile reazione.

Other strengths / Autres points forts / Altri punti di forza

- Guaranteed for 50 million cycles / **Garanti pour 50 millions de cycles** / *Garantita per 50 milioni di cicli.*

- Cylinder mounting / **Montage sur vérin** / *Montaggio su cilindro.*
- Strong and stylish packaging / **Emballage solide et élégant** / *Imballaggio solido ed elegante.*

Machined aluminum spool precisely finished with chemical nickel treatment: the result is very low roughness and a longer duration of seals

Tiroir en aluminium usiné avec finitions au traitement de nickel chimique: le résultat est une très faible rugosité et une plus longue durée de vie des joints.

Spola in alluminio lavorata con finitura di precisione con trattamento di nichelatura chimica: il risultato è una rugosità molto bassa e una maggiore durata delle guarnizioni spola.
